Washington, DC

**Interact with Leading Cancer Scientists,
Entrepreneurs & Survivors**

Mission-Driven Impact. A World Without Cancer is Possible

About This Event

Hosted by the **National Foundation for Cancer Research**, in collaboration with the **AIM-HI Accelerator Fund** and the **Asian Fund for Cancer Research**, this content-rich, full-day event sheds light on what's happening **now** and **next** in the fight against cancer. Program highlights include:

- **New Frontiers for Cancer Research**
- **AIM-HI Women's Initiative Luncheon & Award Ceremony**
- **Innovative Oncology Company Showcase and Investor Perspective**
- **2025 Szent-Györgyi Prize Dinner & Award Ceremony** (*black-tie optional*)

Why Sponsor This Event?

The **NFCR Global Summit** is the premier annual event that brings together top leadership from the entire oncology, cancer research, and related entrepreneurial/business **community ecosystem**.

- Gain access to top leaders across the entire ecosystem working to cure cancer
- Learn about the latest basic/translational research and development findings and discoveries
- Network and interact with decision makers and leaders in private settings, where collaboration is facilitated by NFCR and AIM-HI leadership
- Enhance public visibility while pursuing business development goals

Sectors of Leadership In Attendance at the Global Summit

From Our Participants

"I was really impressed with what you have built and how your organization is a force for driving innovation and research. Thank you for having me join the evening. As I said, please let us know where we can be of help in help advance the mission."

- Mohit Manrao, MBA,
SVP, Head of US Oncology | President, AstraZeneca Foundation

"The organization and delivery of the conference were just superb. I learned throughout the conference and enjoyed catching up with old friends and making new ones. Please let me know if I can be of any help to you and NFCR."

- Ke Liu, M.D., Ph.D.,
Chief Development Officer, Marengo Therapeutics;
Former Chief of Oncology, CBER, FDA

"It's been a great experience and very inspiring event to learn more about cancer research and how different sectors in the healthcare industry can contribute to improving the lives of cancer patients. What is unique about NFCR's summit is that it gathers experts and leaders from research, healthcare, pharmaceuticals, and investment together to discuss and think about what needs to be done to move cancer care forward and how different parties can contribute to the progress. The focus on big-picture views and forward-thinking is really great! I will definitely join you again next year."

- Ling Huang, Ph.D.,
Assistant Scientist, Pancreatic Cancer Center at Henry Ford
Health, Michigan State University

"I thought that the meeting was excellent. We had great people. It was informational, intimate, and very enjoyable. I saw many friends and met many new people. The meeting also reflected new trends in cancer research and care and provided new avenues for support from NFCR and investments by AIM-HI. Thank you for including me in these activities and festivities during the Global Summit."

- Raju Kucheralapati, Ph.D.,
Paul C. Cabot Professor of Genetics, Harvard Medical School

"I wish I was younger in my career because the format of the conference of mixing scientists, entrepreneurs, and investors would have really opened my eyes."

-Daniel Johnson, Ph.D.,
Professor and Vice Chair of Research, Otolaryngology and Head
and Neck Surgery, University of California San Francisco

*"Let me state right at the beginning that if I don't attend another great conference for the next few years, I will not mind it because of what I was just given the opportunity to attend. Thank you very much for giving me such a prominent slot in the morning panel among some incredible women in the field. It was a humbling experience to be in the company of so many outstanding and accomplished. Congratulations on organizing a totally mind-blowing NFCR Global Summit and collecting a constellation of shining stars under one roof for several days! Besides the talks and panel discussions, **the opportunity to network and exchange ideas with others was deeply appreciated. I also loved the way you mixed hard science, heartbreaking oncology stories, and glamorous dinners.**"*

*-Azra Raza, M.D.,
Chan Soon-Shiong Professor of Medicine,
Columbia University in New York*

National Foundation
for Cancer Research
We Make Cures Possible

The National Foundation for Cancer Research (NFCR) is a 501(c)(3) nonprofit organization co-founded in 1973 by Nobel Laureate Dr. Albert Szent-Györgyi and Attorney/Business Entrepreneur Franklin Salisbury, Sr. NFCR provides scientists in the lab the critical seed funding they need to make game-changing discoveries in cancer detection, treatments, and prevention and ultimately, a cure for all cancers. NFCR has distinguished itself in the cancer research sector by emphasizing “high-risk, high-impact” long-term and transformative pioneering research fields, often overlooked by other major funding sources. With the support of more than 5.3 million individual donors over the last 51 years, NFCR has provided \$415 million in funding to cancer research, prevention, and public education. NFCR-supported research has led to some of the most significant life-saving discoveries that benefit patients today.
